

At Plexpack we focus on one thing— Flexible Packaging Solutions That Fit Your Needs

We build best-in-class bag sealing, shrink wrap and bundling solutions. Our modular systems are made-to-order with customizable options and add-ons to fit your unique products, budget and packaging operation.

We work with you to deliver results tailored to your requirements, instead of trying to up-sell you on multiple products for your line or a solution that doesn't fit.

More than 5,000 customers worldwide depend on our Emplex Bag Sealers and Damark Shrink Wrappers for packaging efficiency, product integrity, safe transport and attractive presentation.

EMPLEX BAG AND POUCH SEALING SYSTEMS provide consistent, strong hermetic seals that keep your products pure, fresh, and secure. Emplex sealing systems are proven reliable in a wide range of applications and environments. Emplex modular machines are plug and play with a wide selection of add-ons, such as barcode print and reject systems, vacuum seal and gas flush, trimming, conveying, and robotic handling.

EMPLEX CONTINUOUS BAND SEALERS are ideal solutions when speed, seal integrity and versatility are paramount. We offer horizontal and vertical sealing systems in stand alone and inline configurations for a wide range of specialty and high speed applications. Our band sealing systems provide outstanding performance for products of nearly any weight, size, and type, including stand-up, gusseted, pillow, wicketed, and zippered bags.

Types of Emplex band sealers include:

- **VALIDATABLE SEALERS** for medical, pharmaceutical, nutraceutical, dental, and food manufacturers that need to validate consistent seal integrity.
- **STANDARD SEALERS** for a wide range of products packaged in pre-made, open mouth heat sealable bags.
- **HEAVY DUTY, HIGH SPEED SEALERS** for products over two pounds or products of any weight that require extra strong seals, high density, thicker films or high

speed production.

- **SEMI-AUTOMATIC SEALERS** for horizontal or angled applications that require increased production. Designed for fully automated, semi-automatic, or hand-fed loading.
- **TABLE TOP SEALERS** for low production or small footprint packaging operations.

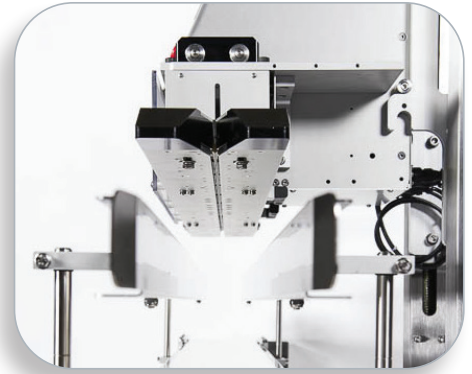

EMPLEX VACUUM SEALING SYSTEMS

create high quality, vacuumed, gas flushed bags. Vacuum-sealed bags extend shelf life, protect against spoilage and reduce volume for more compact packages. Emplex Vacuum Sealers are available in impulse and continuous band systems in standard or custom designs. Nitrogen gas flush systems can be added for modified atmosphere packaging to improve protection,

freshness, and oxidation resistance.

EMPLEX AUTOMATED BAGGING SYSTEMS

ABS SERIES integrated systems provide

an all-in-one automated solution for a wide range of dry flowable, weigh/count applications. The ABS combines robust, stainless steel bag sealers with food grade bag presenters, hoppers, spouts and conveyors to produce hermetically sealed packages weighing up to 10 lbs (4.54 kg) and up to 12" (30.48 cm) wide and 16" (40.64 cm) tall.

INSTABAG creates sealed bags from printed and non-printed film stock. Instabag creates hermetic side seals and cross seals to form a bag around products of nearly any length. The Instabag system can also create a linear group of individually sealed products.

EMPLEX STAINLESS STEEL WASHDOWN SEALERS

are trusted worldwide by food, nutraceutical, pharmaceutical, chemical, agricultural, and other manufacturers that require frequent cleaning of their packaging equipment with powerful streams of water.

Plexpack's VacPack impulse vacuum sealers set the standard for food, protein, electronics and medical packagers that require a heavy duty, washdown vacuum and gas flush sealer at a moderate investment.

Plexpack's VacPack Series are robust, stainless steel food grade sealers that create vacuum and gas flushed sealed bags for a wide range of package sizes, including extra wide and heavy products.

The VacPack Series includes the VP2400, VP3000, and VP3600 floor stand models Tabletop models—VP2440, VP3040 and VP3640 are also available. All models

include the same washdown, vacuum, and gas flush capabilities.

VacPack comes standard with a 5.7 inch color touch-screen controller that simplifies operation and package customization. The modular design and extra wide seal section provides allows

convenient access to the seal section for easy cleaning and maintenance.

DAMARK SHRINK WRAP AND BUNDLING SOLUTIONS provide precise wrapping, seal formation and heat application for consistent strong, visually appealing packages. Damark solutions provide superior performance in a wide range of applications, including single products, bottles and jars, multipacks, boxes, trays, supported items, unstable, unsupported items, unusual shapes, sizes or difficult to wrap products. All Damark systems offer ergonomic product loading, quick film changeover and intuitive adjustments.

DAMARK L-BAR SEALERS create affordable polybags around products by simultaneously forming a side seal and end seal on continuous fed, center-folded film. Combined with a shrink tunnel, L-Bar Sealers provide tightly wrapped packages and bundles for a variety of large and small products. All Damark L-Bar sealers provide precise adjustments for conveyor speed, dwell time, and seal temperature.

DAMARK COMBO SYSTEMS maximize floor space, efficiency and value by providing a complete shrink wrapping solution. Damark offers compact all-in-one chamber shrinkwrap solutions and large single-frame and two-frame integrated L-Bar sealer and tunnel systems. Damark combo systems are

highly efficient solutions that reduce costs and produce pleasing packages for a wide range of small, large, stable and unstable products. All Combo Systems provide quick changeover and easy film load, intuitive controls and precise seal and wrapping adjustments for strong, accurate packaging.

DAMARK TRAY WRAPPERS AND SHRINK BUNDLERS are ideal solutions for customers which need to produce moderate to high volumes of strong, attractive multipacks or bundles. Damark solutions include a wide range of manual, semi-automatic and fully automatic inline systems for creating bull's eye packages. Damark's

durable and flexible solutions include high speed, continuous motion, right-angle and collating wrappers. Popular features and

options include product upstacking, broken seal alarms, print registration, increased seal opening, low film indicators, inline product pushers, multi-lane infeeds, and extended conveyors.

DAMARK INSTAWRAP FULL ENCLOSURE SYSTEM combines the outstanding film control of a side sealer and the product handling and efficiency of a sleeve wrapper to deliver neat, clean seals for strong, attractive packages in less floor space than most full enclosure systems. Damark full enclosure systems reliably handle products up to 300 lbs to create strong attractive packaging with a good return on investment for difficult to wrap products.

DAMARK SHRINK TUNNELS are sold separately or paired with any Damark shrink wrapping and bundling system. Damark shrink tunnels are also frequently used for tamper evident banding solutions and in other manufacturing applications requiring consistent heat application as products move through a line.

INDUSTRY APPLICATIONS

Emplex and Damark Solutions are available for a wide range of industry applications including:

- Automotive parts, fluids, and accessories
- Baked goods
- Baking products
- Beverage bottles, cans, and stand-up pouches
- Boxed and cartoned products
- Bulk items
- Candy
- Cannabis
- Cleaning products
- Coffee
- Construction materials
- Corrugate and flat boxes
- Fertilizer
- Fish
- Fresh food, produce, and dairy
- Furniture
- Grains
- Hardware, parts, and tools
- Health, beauty, and personal care
- Home and garden
- IV Bags
- Jerky, dried food snacks
- Medical devices
- Meat and other protein products
- Mulch, soil, and gravel
- Nuts
- Office supplies
- Paper products
- Pet food and products
- Pharmaceutical/ Nutraceutical
- Poultry
- Powders and dry flowables
- Refrigerated and frozen products
- Seeds
- Snacks
- Sterile products
- Surgical supplies
- Tea
- Tamper evident brands
- Textiles / Laundry

SERVICE AND SUPPORT

Every Plexpack solution is backed by multilingual support and service from our offices in Canada and the US or our international network of distribution partners. We provide sales, service and support in 19 languages. You can be certain from first contact through the entire product lifecycle, Plexpack will provide personal attention to your flexible packaging needs.

Service and support includes:

- Installation Support
- Technical Support
- Documentation
- Genuine OEM Spare and Replacement Parts
- Field Service
- Equipment Assessments and Performance Checks
- Upgrades, Retrofits, and Modifications
- Training by a PMMI Certified Trainer

What our Customers Say:

Plexpack has been our partner for over a decade. Reliable Equipment; fast and quality service. Parts are always in stock.

- Canada Compound Corporation

We Speak Your Language!

We provide sales, service and support in 19 languages:

BULGARIAN	FILIPINO	SPANISH
