

Washdown Sealers

Overview

Emplex Washdown Bag Sealers deliver high speed hygienic packaging in an easy-to-clean NEMA 4- and 4X-rated design. All exposed surfaces are thoughtfully designed for fast, thorough washdown and corrosion protection. Control boxes and electrical enclosures are constructed from Stainless Steel 316 with a water shedding and protected design for optimal protection. Frame and key components are constructed from 316 Stainless Steel and anodized aluminium parts with chemical resistant coating. Washdown capable conveyors and belts are either interlock belting or standard urethane depending on requirements.

Emplex NEMA 4- and 4X-rated bag sealers are trusted worldwide for packaging meat, poultry, seafood, agricultural and chemical products—indoor and outdoor.

NEMA-rated Washdown MPS 7500

Features & Benefits

- NEMA 4- and 4x -rated
- All stainless steel construction
- Enhanced water-shedding design and corrosion resistance
- Modular, made-to-order
- Easy access sealing section for 5 minute or less seal band changeover
- Variable speed
- Cool down mode
- Easy-to-use 5.7" color touchscreen
- Multilingual programming
- Integrated recipe management
- User-defined preferences for fast, repeatable set up
- Preventative maintenance reminders
- Diagnostics and background monitoring of key processes
- Pictorial maintenance guides and instructional tutorials

Washdown Models

Standard: MPS 7100/7500
Heavy Duty: MPS 14000
Automated: ACS 7200/7300/7313
Vacuum Gas Flush: Washdown capabilities available on all Emplex Vacuum Gas Flush sealers.
Validatable : MPS 7300/7700, MPS 14000, ACS 7200/7300

Specifications & Options

All washdown models include the advanced NEMA 4 and 4X environmental protection capabilities outlined above plus the specifications, features and options of their core models. For key specifications and options of washdown models see their core model pages or talk to a Plexpack representative.
