

# VS 1

VacPack VS 1

## Overview

The **VacPack VS 1** is a high-quality, high value vacuum gas flush sealers in a compact tabletop design. It produces hermetically sealed packages on any heat sealable bag up to 12 mil/300 micron in thickness (6 mil/150 micron maximum when gusseted).

The standard color touchscreen interface places all crucial settings and variables at your fingertips. Vacuum, gas flush and sealing processes on VS sealers can be adjusted and monitored to accommodate variations in products and bag material.

VS sealers provide multistage vacuum and gas flush for softer vacuums and lower residual oxygen levels. VS sealers employ two 316L grade stainless steel ejector style vacuum pumps for strong gas and vacuum flows.

Over-sized heavy duty air cylinders ensure outstanding seal pressures for high quality seals. A low pressure safety close helps ensure operator safety.

The **VS 1** comes standard with one vacuum gas flush nozzle. Additional nozzles are available as an option.

## Features & Benefits

- Multi-stage vacuum and gas flush
- Extra-wide seal lengths
- Compact footprint
- Plug and play
- Low maintenance
- Easy-to-clean
- Heavy duty air cylinders
- Powerful easy-to-use 5.7" color touchscreen
- Fast, simple changeovers
- Sanitary design
- Low pressure safety close
- Multilingual programming
- Recipe management
- User-defined preferences for fast, repeatable set up
- Numerous options and upgrades

## Options

- Additional Nozzles
- Extended Seal Lengths
- NEMA 4 or NEMA 4X
- Validatable Sealing
- Product Shelf
- Floor Stand with Adjustable Angles

## Specifications

**Electrical:** 120V 12A or 220V 6A

**Sealer Duty:** Impulse

**Multi-Stage Vacuum/Gas Flush:**

Ejector style, stainless steel nozzles

VS 1: 1 nozzle

VS 2: 2 nozzles

**Air Requirement:** 15 CFM 80 PSI

**Sealer Orientation:** Horizontal (tabletop)

**Sealer Bar:** Anodized Aluminium

**Sealing Width:** 1/4" (6.35 mm)

**Usable Seal Length:** Choice of:

20" (50.8 cm)

25" (63.5 cm)

30" (76.2 cm)

**Seal Throat Depth:** 5" (12.7 cm)

**Pressure Control:** Manual

**Time Control:** Digital

**Frame:** 316L Stainless Steel

**Environmental Protection:** Standard cleaning and wipe down

**Maintenance:** One touch removal of vacuum gas flush tubes

Easy change nichrome

Easy change Teflon covers

Maintenance alerts

**Controller:** Programmable 5.7" color touchscreen

VacPack VS sealers are an ideal solution for food, protein, electronics and medical packaging.
